

2025 Medical Impact & Outcomes Report – Amigos Internacionales

\$185,000 Unlocks \$10,220,900 in Medical Care

2025 AMIGOS MEDICAL MISSIONS

Uganda • Burundi • Nigeria

Medical value calculated using conservative U.S. cost equivalents for services delivered across all outreach sites.

66,295 Patients Served

\$185,000 Total Program Investment

\$10,220,900 Medical Value Delivered

IMPACT STEWARDSHIP

\$2.79 = \$55.25 in Medical Care

Average Cost
Per Patient Encounter

Delivered

Key locations of care

Restoring Sight

- 985 Cataract Surgeries
- 4,247 Eyeglasses Provided
- 3,610 Eye Clinic Treatments

Treating Disease

- 939 Cancer Treatments
- 12,773 Medical Consultations

Supporting Children

- 1,300+ Immunizations Given
- 3,917 Children Treated

1,650 Patients Seen

- 1,300 Cataract Surgeries

2,360 Patients Seen

- 13,899 Prescriptions Filled

Medical Camps & Eye/Surgical Missions

Medical Outreach

Ogul Village Surgical Camp
Uganda March 30, 2025

- 1,600 Patients Seen
- 1,160 Cardiology Screenings

Bihweju Medical Eye Camp
Uganda (May 30, 2025)

- 1,650 Patients Seen
- 1,500 Eyeglasses Provided

Burpono Surgical Camp
Uganda

- 5,169 Patients Seen
- 824 Immunizations

Ogul Village Surgical Camp, Uganda

- 1,600 Patients Seen
- 1,160 Cardiology Screenings
- 120 Cataract Surgeries

Bihweju Medical Eye Camp, Uganda

- 1,650 Patients Seen
- 270 Cataract Surgeries

Burundi Medical Camp, Uganda

- 1,060 Patients Seen
- 146 Cataract Surgeries

Burundi Medical Camp, Uganda

- 5,163 Patients Seen
- 824 Immunizations

Ocube Medical Eye Camp, Uganda

- 1,060 Patients Seen
- 310 Cataract Surgeries

Nigeria Medical Outreach

- 1,356 Patients Seen
- 43 Cataract Surgeries

This document presents the verified medical impact of Amigos Internacionales' outreach efforts in 2025. Medical value estimates are based on conservative U.S. healthcare cost equivalents applied to services delivered in field settings. It reflects completed medical missions, surgical interventions, and community-based healthcare delivery across multiple countries.

EXECUTIVE SUMMARY:

In 2025, Amigos Internacionales delivered large-scale medical outreach across underserved communities in East Africa and beyond, combining surgical missions, mobile medical camps, and ongoing clinical services.

- **Total Investment:** \$185,000
- **Medical Value Delivered:** \$10,220,900
- **Individuals Served Through Medical Outreach:** 66,295
- **Average Cost Per Patient:** \$2.79
- **Medical Value Per Dollar Invested:** \$55.25
- (This includes both high-volume clinical care and complex surgical procedures.)

Even when including complex and high-cost surgical procedures, each dollar invested generated over fifty-five dollars in medical care.

REAL-WORLD IMPACT

Behind every number is a life changed.

In 2025, children born with correctable conditions received surgeries that restored their ability to eat, speak, and live without stigma. Patients who had lost their sight regained vision through cataract procedures. Families who had never seen a doctor received treatment, medication, and hope—often for the first time.

This is not just medical outreach.

It is the restoration of dignity, health, and future.

PROGRAM SCOPE:

Medical outreach was conducted across:

- Uganda

- Burundi
- Nigeria

Programs included:

- Surgical camps
 - Eye care missions
 - Pediatric surgical interventions
 - Community medical clinics
 - Laboratory and pharmacy services
-

KEY OUTCOMES:

Major interventions included:

- Thousands of medical consultations
- Cataract and vision-restoring surgeries
- Cancer screenings and treatments
- Pediatric reconstructive surgeries
- Dental procedures and treatments
- Immunizations and child wellness exams
- Laboratory diagnostics and medication distribution
- Wheelchair distribution for mobility-impaired patients

Specialized surgical care included:

- Cleft palate and reconstructive surgeries
 - Pediatric urology procedures
 - ENT interventions
 - Complex infant surgical cases
-

REAL STORIES BEHIND THE DATA

The outcomes presented in this report reflect real individuals and families whose lives were directly impacted by medical outreach and surgical care.

For example, one young burn survivor in Uganda required complex treatment and long-term recovery support—highlighting both the severity of unmet medical needs and the life-changing impact of access to care.

<https://www.amigosii.org/help-alfred-heal-burn-survivor-in-uganda-needs-surgery>

In another case, a patient receiving care at a rural medical clinic experienced a transformative moment—demonstrating how access to even basic medical services can alter the course of a life.

These stories represent just a small portion of the broader impact reflected in the data.

MODEL INSIGHT:

This impact was achieved through a combination of:

- Volunteer medical professionals
- Strategic partnerships
- Mobile outreach infrastructure
- Local follow-up care systems

This integrated approach allows Amigos Internacionales to deliver high-value care at a fraction of traditional costs.

WHAT THIS MEANS FOR DONORS

Because of this model:

- A modest gift can help deliver life-changing care
- Entire communities gain access to healthcare where none exists
- High-cost surgeries become accessible to those who would never receive them

Even small contributions participate in large-scale outcomes.

CONCLUSION:

The 2025 medical program demonstrates that strategic, mission-driven healthcare can reach tens of thousands while delivering life-changing surgical care to those most in need.

But more importantly, it proves that access to care is not determined by geography—it is determined by whether someone chooses to act.

And that is what makes this work possible.
